

**CARON<sup>®</sup>** provides the width,  
the weight and the performance  
with Semi-U Trashblades  
for the CAT 836G,  
826G and 816F.

CAT 826G  
Over 80,000# with  
Caron Wheels and Blade

Built to make the most of these powerhouse compactors, the Caron Semi-U Blade brings a new level of efficiency and versatility to the solid waste industry. The Semi-U design features a wider profile with angled external wings that confine either refuse or soil to the blade path, reducing the windrow pattern left by conventional straight blades. In addition, the Caron Semi-U Blade brings a minimum of 10% more weight to the front of the machine where it is needed most. **The Semi-U Blade is optional for the CAT 836G, 826G and 816F. Ask about the Caron Semi-U Blade for crawler-type tractors. Contact Caron for complete details.**

CAT 836G operating weight  
with Caron Semi-U Blade,  
Standard or High-Density Wheels  
with compatible Caron-built Axle  
Guarding and additional CAT  
options may exceed 120,000 lbs.
